

Kayode Olanrewaju

Front end Developer

Profile

I build fast, responsive websites that help businesses look professional and convert visitors into customers.

As a Frontend Developer, I work with React, Next.js, and Tailwind CSS to create clean, modern interfaces for portfolio sites, landing pages, and business websites.

I handle API integration, optimize for speed and mobile performance, and deploy reliable, production-ready sites using Vercel and Netlify.

My focus is simple, clean code, smooth user experience, and results you can actually use. I'm constantly improving my skills and committed to delivering high-quality work on every project.

Employment History

Frontend Developer at Bizaflix Co, Lagos

Mar 2023 — Present

- Developed responsive and modern web applications using Next.js and Tailwind CSS
- Built and deployed a personal portfolio website showcasing projects and technical skills
- Created reusable UI components to improve development efficiency and maintain consistency
- Optimized websites for speed, performance, and mobile responsiveness
- Implemented clean and scalable code structure for better maintainability
- Integrated basic SEO practices to improve site visibility
- Collaborated with design concepts to deliver user-friendly and visually appealing interfaces

Frontend Developer at Artmedia Africa, Lagos

Nov 2024 — Aug 2026

- Developed and maintained a responsive website for an art gallery and online art sales platform
- Designed clean and visually engaging layouts to showcase artworks and improve user experience
- Built user-friendly interfaces to display art collections, pricing, and artist information
- Optimized website performance for fast loading and smooth navigation across devices
- Implemented mobile-responsive design to ensure accessibility on all screen sizes
